Web Design Guidelines - Efrei Computer Science Department

This document outlines the fundamental graphic design guidelines for the creation of the Efrei Computer Science Department website. These guidelines aim to ensure strong visual consistency and a clear, modern, and professional brand identity.

1. Color Palette

Colors must be used strictly according to these codes to ensure consistent rendering on the web (HEX/RGB).

Primary (Institutional) Colors

These colors structure the space and convey the school’s identity.

Color Name	HEX (Web)	RGB (Screens)
Academic Blue	#0A316C	10, 49, 108
Pure White	#FFFFFF	255, 255, 255

Secondary Colors (Accents & Ambience)

Drawn from the photographic art direction, these colors are used in small touches (buttons, highlights, photo filters) to energize the institutional blue.

Color Name	HEX (Web)	RGB (Screens)
Technological Cyan	#81ECEC	129, 236, 236
Electric Yellow	#FDCB6E	253, 203, 110

2. Typography

The style guide prioritizes readability and modernity with **sans-serif** fonts. Since the exact fonts are proprietary, here are the recommended Google Fonts equivalents for web integration.

Headline Typography (Headings & Subheadings)

- **Recommended family:** Montserrat or Poppins (geometric sans-serif).
- **Permitted weights:** Bold (700) for headlines, Medium (500) for subtitles.
- **Case:** Uppercase allowed for institutional subtitles.
- **Web Hierarchy:**
  - $H1$: 40px - Bold - Line spacing 1.2
  - $H2$: 32px - Semi-Bold - Line spacing 1.3

Body Text Typography (Paragraphs & Lists)

- **Recommended font family:** Open Sans or Roboto (humanist sans-serif and highly legible).
- **Allowed weights:** Light (300) to Regular (400).
- **Web Hierarchy:**
  - p (Standard Text): 16px - Regular - Line spacing 1.5

    - Lists: 14px - All caps - Light - Letter spacing (tracking) increased to 1.5px.

3. The Logotype & Trust Marks

Use of the Main Logo

- **Positioning:** The logo must always be placed in the upper-left corner of banners or the web header.
- **Color:** Exclusively **white** (#FFFFFF) when placed on the Academic Blue background. Academic Blue on a white background.
- **Clearance Area:** There must always be an empty space (equivalent to the size of the dome icon) all around the logo, with no text or visual elements overlapping it.

Accreditations (Partner Logos)

- **Presentation:** "Label" logos (CGE, Cti, EESPIG) must be grouped in a box with a **Pure White** background (generally in the bottom right corner) to ensure their visibility in their original colors.

4. Iconography & Photography (Art Direction)

An image is not just filler; it conveys the school’s spirit.

Photography Guidelines

- **Subject:** People must be the focus (students). Attitude: focused, professional yet youthful.
- **Atmosphere / Lighting:** Prioritize nighttime or dark settings (visual *"Dark Mode"*) illuminated by neon lights or screen glare (a subtle reference to the world of tech and coding).
- **Styling:** Photos should feature cool tones (cyan/blue) to evoke a digital aesthetic, contrasted with warm tones (yellow/orange) to convey an urban, vibrant feel.

User Interface (UI) Elements

- **Bullet points:** Do not use standard dots (•). Use right-facing **right-angled triangles** (◢ or ▶) to symbolize dynamism and progress. Color: Pure white.

5. Layout Rules (Grid & Composition)

- **Hero Banners:** Use a **diagonal composition**.
    - A diagonal geometric cut should separate the solid-color area (institutional text) from the photographic area.
    - This breaks the rigidity of a strict vertical separation and adds movement (the engineer's dynamism).
- **Alignment:** All text in the institutional column (left) must be strictly **left-aligned** to facilitate reading.
